

ABSTRACT

The present invention relates to a mirrored document holder including a support stand, whereby the invention functions as a document holder, a mounted mirror, and an advertising vehicle. The document holder includes a copyholder with spring biased plates and a mirror included on at least one of the plates. A plate may be sized to allow placement of advertising indicia in addition to supporting the document in place in a breezy environment. The present invention further includes a flexible support stand with joints that while flexible are capable of firmly supporting heavy documents. The document holder of the present invention may, for example, be mounted on a computer monitor or a dashboard.
